

SAQUIB MANSURI

+91-7737879079 | saquibmansuri@gmail.com | linkedin.com/in/saquibmansuri30 | github.com/saquibmansuri | vCard

Certified Multi-Cloud Solutions Architect & DevOps Engineer with a strong background in the IT industry, experienced across fast-paced startups and large-scale enterprise environments. Technophile driven by curiosity, innovation, and a passion for delivering impactful solutions.

EDUCATION

Rajasthan Technical University

Bachelor of Technology in Computer Science

Kota, Rajasthan, INDIA

Jul 2018 – Jul 2022

S.J Public School

CBSE Schooling, PCM with IT

Jaipur, Rajasthan, INDIA

Apr 2003 – Apr 2018

EXPERIENCE

CrestData

DevOps Engineer – E3

Ahmedabad, INDIA

Feb 2026 – Present

- Worked for *NETSKOPE*, deployed and managed scalable, HA infra across AWS, Onprem Openstack using Terraform, Rancher, Salt, Github Actions, Jenkins, Gitlab, K8s and Argocd.
- Worked for *HARNESS*, leveraging internal tools including code and artifact repositories; deployed and managed 8 production K8s environments on GCP using Helm charts, built unified CI/CD pipelines for branch cut, release orchestration, and multi-environment deployments, while handling end-to-end release management
- Managed distributed and relational databases including PostgreSQL and YugabyteDB, handling provisioning, upgrades, backup/recovery, performance tuning, replication, and high availability across cloud and on-prem environments
- Performed RCA for recurring incidents, identifying performance bottlenecks, misconfigurations & ci-cd failures
- Optimized linux based systems, including kernel-level debugging, service failures, networking issues and routine operations through bash and python, with monitoring and alerting systems using Prometheus and Grafana.

TechBlocks

DevOps Consultant

Ahmedabad, INDIA

Jul 2025 – Feb 2026

- Worked on 150+ projects for *Michaels Stores USA* (michaels.com) on Google Cloud, implementing Mandiant-aligned security, compliance and cloud architecture best practices
- Automated CI/CD pipelines using GitHub Actions with continuous sync via ArgoCD and enforced Infrastructure as Code (IaC) using Terraform to improve deployment consistency and scalability
- Provided production support through proactive monitoring, on-call incident response and observability improvements using Prometheus, Grafana and other DevOps tools

Promact Global

DevOps Engineer – II

Vadodara, INDIA

Apr 2025 – Feb 2026

- Designed & delivered over 20+ secure, optimized, on-prem & cloud-native infrastructures across diverse industries including AI/ML, Healthcare, E-Learning, Retail, Food Tech, Project Management, Carbon Accounting and CMS Solutions on AWS, Azure, GCP and Hetzner.
- Strengthened organizational cloud capabilities by contributing to official partnerships with AWS, Microsoft Azure and Google Cloud and implementing emerging technologies to drive innovation
- Designed, reviewed and deployed resilient microservices-based architectures for mobile and web applications, ensuring scalability, reliability and adherence to best practices.
- Automated deployments and delivery processes by setting up CI/CD pipelines, monitoring and alerting systems, enhancing uptime, observability and operational efficiency.
- Drove organizational learning by mentoring freshers, developing upskilling programs and supporting production environments through on-call operations and proactive maintenance.

DevOps Engineer – I

Sep 2023 – Apr 2025

- Designed and automated secure, optimized multi-cloud architectures (AWS, Azure, GCP, Hetzner) using IaC tools
- Deployed web applications with CI/CD pipelines (GitHub Actions, Azure DevOps, Bitbucket) and implemented monitoring, alerting, and automation systems
- Developed serverless functions, performed data analytics tools and maintained secure, zero-downtime operations

- Optimized cloud costs, built internal tools (HTML, CSS, JS), deployed AI services on cloud

Circulants

Jaipur, INDIA

Associate Developer

Jan 2022 – Apr 2023

- Built and optimized IQ Bots, Task Bots and Meta Bots using Automation Anywhere v11 and A360
- Migrated bots from v11 to A360, provided operational support, trained teams and developed Python automation scripts for integrations
- Worked on MS SQL Server, Python, AWS, Azure and Automation Anywhere V11/A360 and supported in ATARA BIO project

PERSONAL PROJECTS

Blue-Green Deployment Pipeline | Docker Swarm, Nginx, GitHub Actions, SSL, Virtual Machines

Implemented a blue-green deployment pipeline in a virtual machine using Docker Swarm, Nginx as reverse proxy, certbot for ssl for zero-downtime application releases and seamless traffic switching

Slot-Based Deployments | Azure Web Apps, Azure DevOps Pipelines

Configured slot-based deployment strategy (dev, staging and production slots) on Azure App Service to enable safe rollouts, A/B testing, and quick rollback capabilities

Kubernetes CI/CD | GKE, AKS, EKS, ArgoCD, GitHub Actions

Built multi-cloud CI/CD pipelines for Kubernetes clusters with and without ArgoCD, automating containerized application deployment across GKE, AKS, and EKS

Static Site Hosting | Cloud Storage, Cloud CDN, SSL

Set up static site hosting using CDN and object storage with SSL termination to ensure high availability, caching efficiency, and secure content delivery

Centralized Logging | Graylog, Elasticsearch, Docker

Deployed and configured a centralized Graylog server to aggregate logs from multiple application VMs, enabling unified monitoring and troubleshooting using logs

API Load Balancing | API Management

Implemented load balancing and routing between multiple services and APIs using API Management/Gateway to ensure scalability and fault tolerance

TECHNICAL SKILLS

Top Skills: AWS, Azure, Google Cloud (GCP), Openstack, Hetzner Cloud, Azure Bicep, Terraform, GitHub Actions, Azure DevOps Pipelines, Bitbucket Pipelines, Docker, Docker Compose, Docker Swarm, Kubernetes, Git, Github Actions, CI/CD Pipelines, ELK Stack, Prometheus, Grafana, Apache Airflow (ETL), Shell/Python Scripting, Databases (Relational, NoSQL, In-Memory), Ansible, Serverless Functions, Cloud Security, Networking, Cloud Architecture, Linux, ArgoCD, Kong, Akamai, Rancher, Graylog, Yugabyte, Harness Apps

Frameworks & Stacks Worked On: Next.js, NestJS, Angular, .NET, Vite, React, Astro, Java, Strapi, MedusaJS, Power Automate, Power BI, Selenium, FastAPI, Python, Ionic, Hugging Face, Jest, Playwright, Cypress

AI Tools Familiarity: Cursor, Perplexity, Gemini, Claude, ChatGPT, Bolt, Windsurf, GitHub Copilot, Trai.ai, Softgen.ai, Blackbox, Azure OpenAI, Aide.dev, Replit, Lovable.dev, n8n, langflow

Other Tools & Interests: Final Cut Pro, Filmora, Adobe Photoshop, Android Studio, AI/ML Concepts, Mobile App Development

CERTIFICATES

Certified Kubernetes Administrator (CKA) 
AWS Solutions Architect – Associate 
Google Cloud Professional Cloud Architect 
Microsoft Azure Solutions Architect Expert 
Microsoft Azure Administrator Associate 
Microsoft Azure Fundamentals 

PUBLISHED WORK

Blue Green Deployment using Docker Swarm
